

Spring has begun, the garden is awakening. In the midst, lies hundreds of little critters that we will get to know better this month. After all, insects have between 6-10 million species. This month, we are going to get to know just a few better. This month, we are “Bugging out” over ladybugs, spiders, beetles, bees and more....

How can you get to know these little critters better, than to celebrate outside? We will be trying to spend more and more time outside as the weather progresses. This might mean snack outside for picnics and more.....just weather pending. So please bring easier snacks to eat outside and water bottles.

Face painting fun on April 17th and 18th. Do you relate to spiders, ladybugs or butterflies? We will help you transform into your favourite insect.

We will be talking about recycling, reducing and reusing. As well, as making the park look nice ☺ for the month of April.
